Deep Slab Avalanche at Big Sky

Big Sky Resort Northern Madison 1/28/2019 Code HS-AEc-R4-D3-O Notes

Big Sky Ski Patrol triggered a deep <u>hard slab avalanche</u> during control work on January 28th, breaking on a weak layer of facets that formed in early December.

From email: "This <u>slide</u> failed on our layer of greatest concern and had recently been loaded up with 60cm of 1F <u>wind slab</u> from our consistent snowfall over the past 11 days. Crown depth ranged from 3-5' and consensus is that it was about 300' wide. " - BSSP
