

Wind Slab avalanche on Mt. Blackmore

Mt Blackmore
Northern Gallatin
11/10/2019
Code
Latitude
45.44440
Longitude
-111.00400
Notes

Natural [wind slab](#) avalanche on the N face of Mount Blackmore on 11/10/2019.

From email: "Noted recent activity on the N face which likely happened yesterday during the storm; upper half of the avalanche and crown had been scoured by wind, but the toe of the debris was still visible and had traveled quite far"
