Loose snow avalanches in Alex Lowe Basin

NORTHERN GALLATIN RANGE Northern Gallatin 1/16/2023 Code L-N-R1-D1-S Latitude 45.42910 Longitude -111.00200 Notes

From obs: "Toured into Alex Lowe basin today and noticed lots of point release slides. Most started as spindrift in the cliff bands along the ridge and gained more snow as they fell into the aprons. Skied a north and south facing <u>couloir</u>, <u>ski cut</u> at the top of both runs and got the new snow to sluff most of the way down. Didn't encounter any cohesive slabs, just lots of sluff sliding down."
