Natural avalanche in Twin Falls Basin

Mt. Bole Northern Gallatin 2/15/2023 Code Latitude 45.41600 Longitude -110.99800

Saw debris and what looked like a crown line from a natural avalanche that probably happened a day or two ago in palace butte basin on a NE <u>aspect</u> above Arden lake. My best guess is 150ft wide crown, 1-2ft deep?
