## Skier caught and injured on Lawn Mower

Lawn Mower - Town Hill Out of Advisory Area 3/4/2023 Code SS-ASu-R2-D2-O Elevation 8400 Aspect NW Latitude 45.50570 Longitude -110.49600

Notes

From obs: "On March 4th around 2:15 PM my partner and I observed a skier (of a separate party that was caught and carried) in a D2 R2 on the Lawnmower in the Absorkas. I believe the <u>slide</u> was released on a buried <u>weak</u> <u>layer</u> (We only observed the crown from a distance). The victim came to a stop approximately 1,200 ft below the start zone and was buried up to his neck. There were multiple tracks on the slope prior to the avalanche. My partner and I skied up to the separate party with the victim approximately 30 minutes after the event."

From another email "FYI big skier triggered avalanche on the lawn mower <u>slide</u> path on town hill today around 3pm. One skier caught and buried to neck and later airlifted out with leg injury. Our party arrived maybe 45 min after the <u>slide</u> and assisted others who were there."
