

Whumphs at Lionhead

Date

Sun, 12/03/2023 - 14:25

Activity

Skiing

From IG: “Skied in the lions head today on a northeast slope at 8,300 feet. Clear wind loading and reactive cornices, however storm snow was low energy with little movement. 10-14 inches of medium density snow. Whumpfing was noticed on all slopes on the eastern half of the compass.”

Region

Lionhead Range

Location (from list)

Lionhead Ridge

Observer Name

Owen Desroches
