

Wolverine Bowl Natural Avalanche, Bridger Range

Wolverine Bowl

Bridger Range

1/15/2024

Code

Latitude

45.83010

Longitude

-110.93400

Notes

From obs: "Wind slabs at the top of the ridge approximately 4-8 inches deep. Continued [wind loading](#) down the wolverine bowl, slabs softer the lower you go. Snowpack has about 1.5 feet of facets with a hard layer on top. New snow building up on top of that layer. Saw one small natural avalanche nearby, appeared a day old."
