

## Skier triggered loose snow in Beehive Basin

Beehive Basin  
Northern Madison  
2/4/2024  
Code  
L-AS-R1-D1  
Elevation  
9400  
Aspect  
W  
Latitude  
45.33430  
Longitude  
-111.38600  
Notes

Multiple natural avalanches and at least one suspected human triggered dry loose in Beehive Basin. Most naturals appeared to have run either last night or yesterday (2/3/24), with a couple potentially older slides. New snow and rapidly changing cloud cover/depth perception made it a bit hard to be sure. Suspect one skier triggered dry loose in W facing trees. One of the W-facing chutes further up valley was also observed to have a crown line at approximately 9000' (no photo)
