

Whumph on Little Ellis

Date

Mon, 02/12/2024 - 16:30

Activity

Skiing

Got a whumph descending the ridge from little Ellis on the ENE facing slope just below the ridge around 7000'.

Saw some small cornices but snow was soft below the ridge. Hopped on the flat ridge top adjacent to a wind lip and got no result.

Region

Northern Gallatin

Location (from list)

Mt Ellis
