

Large slide north east basin of Fan

Date

Sat, 02/24/2024 - 12:40

Large slide in the north basin of fan mountain. The flies is below the north, north east couloir and the crown runs all the way around the basin. It went to the ground below the couloir and a few other places. 10ft crown probably at the biggest point below the couloir.

no photos due to poor camera

Region

Northern Madison

Location (from list)

Fan Mountain
