

Multiple slides on buck

Date

Sat, 02/24/2024 - 16:55

Activity

Snowboarding

Snowmobiling

Saw multiple large slides around the McAtte drainage N/NE aspects. Some were larger than others but all ran on what looked like a persistent grain or even to the ground in some. Probably natural released over last few days.

During our time out the wind was hammering the ridge and clearing transporting and forming slabs.

Region

Northern Madison

Location (from list)

Buck Ridge
