Wind slab in tobacco roots

Date Sun, 04/21/2024 - 11:15 Activity Skiing

Toured up around bell lake today and after a night of wind, triggered a very small wind slab in a north facing couloir at around 9500-10000ft. It was almost 10" deep and was about 10-15ft across. Snow was being loaded through out the day and was staying cold up high.

Region Out of Advisory Area Location (from list) Bell Lake Observer Name Jay Alford
