Small soft slab avalanches near Fairy Lake

Fairy Lake Bridger Range 2/4/2025 Code SS-N-D1 Elevation 7500 Aspect E Latitude 45.90430 Longitude -110.95800 Notes

Toured up around fairy lake today, winds were ripping all day. Saw several d1 soft slabs in upper elevation terrain, many of them running quite far. We opted ski a lower elevation zone and were surprised to find a soft slab (d1/r1) that ran on an east facing slope at about 7500' and about 500-600 ft below the ridge line on a slope just over 30 degrees.
