

Dry Loose avalanches near Cooke

Henderson Mountain

Cooke City

3/15/2025

Code

L-AS-D1

Elevation

9300

Aspect

E

Latitude

45.05240

Longitude

-109.94500

Notes

Today I triggered a D1 dry loose avalanche on a E facing 35 degree slope, 9300 ft on Mt Henderson. The new snow is very low density and is not bonding well to the old interface. I also observed some more dry loose activity/small wind slabs on Sheep Mt, NE facing, 10400 ft.
